

TESTIMONIALS

"I have been to many seminars. I don't understand how, the presentation, marketing and use of the excellent equipment could be done so economically. I have thoroughly enjoyed it. It is the best workshop I have ever attended. Bruce could well be named "the king of sound equipment knowledge."

**- Dennis Cobb,
Page Pond Assembly of God**

"Great job! I would encourage every church to make this seminar a mandatory event for every person who operates the sound system at church."

**- Tony Clayton,
Amarillo South Church**

"Excellent! I would recommend this training to any church that has a sound department, even if they think they don't need any training."

**- Chris Anderson,
Tampa Bay Word of Faith**

Hands-On Audio Seminar for churches

www.AudioSeminar.com

These are **HANDS-ON seminars**, you will sit at a station with a live mixer, EQ, Compressor/Limiter/Gate, Headphones, and more!

Who should attend?

- Those who want to become more familiar with the fundamentals of good sound reinforcement
- Sound technicians who want a deeper understanding of sound fundamentals
- Worship leaders
- Musicians
- Children pastors who work with portable sound systems
- Youth members who demonstrate an interest in sound

Why should I attend?

Because the purpose of celebrating a worship service is for the Gospel to be heard. The Pastor prepares a message and the congregation deserves to hear the word of God flawlessly. A problem with the sound can completely destroy the momentum that is taking place during the worship, having eternal consequences.

What benefits do I get from attending?

The foundation to properly operate a sound system is understanding what each piece of equipment is capable of doing and taking advantage of the resources it provides you to work with. Our seminar helps you gain a good understanding of how your equipment works and how to best apply the principles of operation to your system.

By explaining the principles behind each piece of equipment and then letting you experience it **HANDS-ON** and hear the results, the mysteries behind all the knobs and buttons are revealed. The principles you will learn are applicable to equipment from all manufacturers, including what you currently already have at your church. Because you practice **HANDS-ON** at the seminar, you gain the experience that helps you transfer those principles to the use of your equipment.

Attendees receive feedback from the instructor after performing their mix

TOPICS COVERED

- Cables and Connections
- Balanced vs. Unbalanced cables
- Direct Boxes
- Hooking it all together
- What can I run together
- Understanding signal flow
- What is a buss?
- Where do I plug this in?
- Getting the most out of your mixer
- Principles of troubleshooting
- How to test cables and equipment
- 3 different ways to interface outboard gear with your mixer
- Microphone choices
- Microphone techniques
- Understanding basic gain structure
- Building a consistent team
- Basic mixing principles
- Understanding System Gain Structure
- Advanced System Gain Structure Setting
- Using EQ
- Eliminating Feedback
- Using Effects, Compressors and Gates
- Using Sub Groups

and much, much more!
